# GET STARTED

Thank you for buying a Shot Scope V2. Before you turn on the device please read our full user guide available at:

[www.shotscope.com/getstarted](http://www.shotscope.com/getstarted)

## STEP ONE: DOWNLOAD

Download and install the Shot Scope App available on iOS, Android and desktop.

## STEP TWO: USER PROFILE

Once installed, follow the instructions in the app to create a user profile.

## STEP THREE: CONNECT

Connect your band using the USB cable provided, or the Bluetooth connection and download your courses.

# TIPS & HINTS

Get the most out of your V2 by following these five steps:

- 1 Customize your tags to match your clubs in My Bag, great for comparing clubs against each other.
- 2 Find and download nearby courses quickly and easily with the 'courses nearby feature'.
- 3 Make sure you have the V2 watch in the correct settings: yards or meters and right or left handed.
- 4 Adding positional shots in the editing system is key to more accurate data.
- 5 Retain all of your data, sometimes the bad rounds teach you the most about your game!
